

How To Use QR/Barcode for Facility Management

CREATE YOUR ACCOUNT

Setup Account and Employees, Each mobile employee would install the allGeo app on their phone.

SETUP YOUR QR BARCODE

Use pre-generated QR/Barcode or use allGeo QR/Barcode Generator

SETUP JOB SITES GEOFENCES

Setup Job sites in allGeo i.e. geofenced circle or polygon around work sites.

SETUP QR/BARCODE, EMPLOYEE APP

DISTRIBUTING QR/BARCODE

PUT UP QR/BARCODE

Print and Attach Barcode/QR codes e.g indoor sites, restroom doors, equipment

SETUP RULES

Setup allGeo workflow to automate business processes e.g Monitor QR/Barcode scans and trigger alerts based on field events

QR/BARCODE SCANS

Employees scan QR/Barcode using their App to log work activities in the fields. Every scan is automatically geotagged with job site information.

RECORD FIELD DATA

Employees can record additional field data with the allGeo app using mobile forms, pictures, notes, & scans.

USING QR/BARCODE

REPORTS, ANALYTICS, & ALERTS

REAL-TIME ALERTS

Trigger alerts (sms, email, phone call) based on field data captured by mobile employees e.g. *if QR scan is not completed by 9am, send an alert to helpdesk*

REPORTS & ANALYTICS

Generate custom reports & analytics. Measure daily activities against client SLAs, Compliance requirements, performance metrics.

INTEGRATION VIA API, EDI

Set up scheduled delivery of Reports on a daily, weekly, or monthly basis via email. Integrated data with Business systems using Web APIs, EDI, CSV files.
