

## Industry

Construction

## Customer

Having been in the industry for over 120 years, this customer has established a presence in all 50 states and over 60 countries. Additionally, they have six subsidiaries solely focused on executing crucial infrastructure projects.

## Customer need

The customer needed a platform that fulfilled the following requirements for its two sets of users:

- A clock in/out feature that users can access through the app
- Supervisors/Foremen should be able to mark attendance for their assigned team members
- The ability for employees and Foremen to attach images (selfies) while clocking in
- Two safety-check attestations in form of a check box at the end of the shift
- Display of temperature and weather details during check-in/out.

## New workflow with allGeo

The customer's challenge of managing two distinct sets of employees was effectively addressed with the help of allGeo.

For the first group managed by the first Project Manager (PM), allGeo's app allowed associates to clock in/out, select their task and customer, and attach a selfie with each punch. The app also fetched temperature and weather information with every punch, streamlining the process for employees. Additionally, allGeo's solution enabled the employees to submit two attestations at the end of their shift, providing an efficient and secure method for verifying work.

The second PM's challenge of managing foremen and their respective employees was addressed through allGeo's workflow. The foremen were able to mark attendance for their set of employees using Crew Punching with QR scans. This solution allowed the foremen to attach an employee selfie during clock-in, providing a reliable record of attendance. Overall, allGeo's platform proved to be a valuable tool in streamlining and optimizing the customer's workforce management processes.

## Reports

- **Custom - Timeclock report:** A report highlighting all the hours under one column and segregating them into regular and overtime. Also, showing the attachments and weather logs in the same report.
- **Safety Check Report:** A report highlighting all the safety checks under one report along with their responses.
- **Custom Report for Cost Code:** A report highlighting the total hours worked for each Cost Code (Task).
- **Payroll Report:** A report that is compatible with their payroll platform (Sage).
