Industry

Manufacturing

Customer

The company manufactures advanced dental products for dental clinicians and patients around the world.
Customer need

The customer wanted a complete time and attendance solution to record the clock-in and out times for the employees working in remote locations. Additionally, they want to export the total service hours into ADP® every day for payroll processing.
New workflow with allGeo

allGeo provided the Operations manager with a simplified process to track the employee's location and record their punch-in and out time from the web portal. Additionally, allGeo offered the capability for field employees to select the customer for whom they are working at the start of their shift. The workflow also enabled employee service hours to flow directly into ADP for payroll.

Here are the key reports that the customer is generating to support their new workflow:

- **Breadcrumb Report** provides the location trails of the employees for a particular date range.The location trails can also be seen in allGeo's map view.

- **Standard Manual Report** shows the time and location of every start-day and end-day punches and the hours spent between them.

- **ADP Paydata Report** contains employee payroll details, their associated hours, and rates - all the information required for ADP payroll.
