Manufacturing

Customer need

The company builds and installs premium-quality windows, doors and sunrooms. The company has a large and growing workforce around the nation, and needed to modernize their corporate tools and improve operations.

This included automating processes such as:

- Time tracking and integration to ADP Workforce Now[®], their payroll system
- Creation of job costing reports
- Task dispatch

New workflow with allGeo

The company turned to allGeo and its integration with ADP Workforce Now[®] to help meet these challenges. Two workflows were

Workflow for time clocking against pay codes: Time clocking automated using GPS tracking and Geofences incorporates pay codes for payroll for various sites such as a client site or a retail location like Home Depot. Employees are also able to log time against specific task codes for ADP payroll processing. Different employee groups will have their own specific rules in place.

Workflow for task tracking: allGeo will help in granular task tracking and status information with rate codes, mobile forms and GPS-tagged photos. QR code, Geofencing and forms helps managers collect job related data for job costing reports. The information will then be exported using CSV reports.

The platform also helps managers see their employees' location on a real-time map view and will get live alerts for various statuses such as employees arriving or leaving a job site.
