Industry
Hospital & Healthcare

Customer
A professional association of organizations and individuals responsible for the collection, delivery, analysis, and diagnosis of blood specimens.
Customer need
The customer wanted time clocking at job sites for proof of service and mileage tracking for accurate employee reimbursements. They finally need to export the time & attendance data into their ADP payroll system.

New workflow with allGeo
allGeo helped the customer automate their field service workflow. With allGeo, they can manage their employee's time & attendance using customizable time clock buttons like Start day, To lunch, Specimens delivered, etc. With real-time location and tracking, managers can view the employees' exact location and capture mileage with high accuracy. With the help of custom-built reports and allGeo - ADP connector, the customer can export the payroll logs to ADP Workforce Now,® their payroll system. The customer can now generate several useful reports for proof of service, mileage, payroll logs and also set up notifications and reminders to field employees as they go about their work day. Key reports & capabilities include:

- Breadcrumb reports for capturing the exact location of employees at any given point of time and the hours they spent at that location

- Reports that show employees' time clock punches and their locations through the day, miles between those punches, and notes or messages captured during site visits.

- Custom time clock report for managers to monitor employees punching status with time & location details, calculate the service hours and distance traveled.

- Daily reminders and push notifications to the employees to start and end their day.

- Directly export the employees data into ADP without any human intervention using connectors and API.

By automating many aspects of their Time & Attendance workflow, the customer is able to realize labor cost savings and productivity boost they were looking for, helping them transform the way they run their business.
