

— EVV × COMPLEX WAGE CALCULATIONS

# Automating EVV compliance for homecare

How Delano Association for the Developmentally Disabled Simplified EVV Compliance and Payroll with allGeo

CLIENT DADD	SECTOR Homecare	REGION California, USA	NO. OF FIELD EMPLOYEES 195
----------------	--------------------	---------------------------	-------------------------------

## 01 / Overview

Our client is a leading provider of quality care services, dedicated to enhancing the lives of their patients through a team of over 600 committed staff members, 25 volunteers, and more than 130 skilled physicians.

They are passionate about delivering exceptional healthcare services in their region, understanding that the efficiency of their operations is crucial to achieving their mission.

## 02 / Challenges

Managing caregiver time, patient visits, wages across different shifts and multiple locations created complexity and required significant manual effort. This often led to payroll delays, errors, increased administrative workload, and challenges in ensuring caregiver safety, impacting overall efficiency.

1 Managing caregiver time tracking across multiple patients, locations, and shifts.	2 Ensuring accurate wage codes and overtime calculations for caregiver payroll.	3 Processing payroll manually causing delays, errors, and administrative burden.
--	--	---

## 03 / Solution

The organization implemented allGeo to automate caregiver time tracking and payroll processing across shifts, patients, and locations. The platform pre-processes data, captures wage codes, and calculates hours accurately, reducing manual effort and improving efficiency.

Automated caregiver time tracking across multiple patients, shifts, and location.

Centralized wage code capture across departments for accurate payroll processing.

Automatic calculation of regular and overtime hours, reducing manual errors.

Pre-processed, audit-ready data ensures accurate, compliant, and efficient payroll.

## 04 / Implementation

With the allGeo implementation, the organization gained access to robust reporting tools that improved visibility into caregiver activities, patient visits, and time tracking—enhancing caregiver safety and enabling more efficient patient data management.

1

### Time and attendance reports:

Tracking caregiver visits, locations, and service times.

2

### Visit discrepancy reports:

Identifying errors before EVV submission.

3

### EVV reports via Sandata

Ensuring compliant data aligned with HIPAA and regulations.

## 05 / Results

The implementation of allGeo’s Field Workforce Automation streamlined operations and improved efficiency by automating time tracking and reporting. Managers gained better visibility into caregiver activities and attendance, reducing manual effort, and errors. This enabled the organization to ensure accurate data submission to Sandata while allowing staff to focus more on delivering high-quality patient care.

Improved visibility into caregiver time, attendance, and patient visit activities.

Reduced manual errors through automated time tracking and reporting processes.

Created a system built to support future workforce growth.

Visits, time, and payroll unified into one verifiable data stream.

## 06 / Conclusion

The successful implementation of allGeo’s EVV system for homecare marks a significant shift in how the organization manages and reports patient care services. By leveraging this technology, they have improved operational efficiency, strengthened compliance, and streamlined workflows. This transformation enables them to deliver high-quality patient care while ensuring accuracy and reliability across their processes.

allGeo by Abaqus ([www.allgeo.com](http://www.allgeo.com)) is an enterprise-grade field service management platform for mid-size and enterprise organizations. The platform supports the full field service lifecycle, including scheduling and dispatch, workforce monitoring, time and job tracking, safety and compliance workflows, and reporting and analytics.

With built-in configurability, allGeo supports complex workflows in highly regulated industries such as Construction, Home Healthcare, and Trade Services. Organizations using allGeo improve workforce productivity, strengthen worker safety, and increase accuracy across payroll, compliance, and job costing.
