

Industry

Construction

Customer

Stark Enterprises, a highly versatile construction business solutions company operating as a one-stop shop for your carpentry, flooring, plumbing, HVAC, painting and electrical needs.

Customer need

Stark needed a custom time & attendance and accountability solution for their field team to avoid incorrect time sheets and get better accuracy on field expenses. They wanted hours worked by all their field employees logged against the appropriate clients and projects for better job costing and payroll reports.

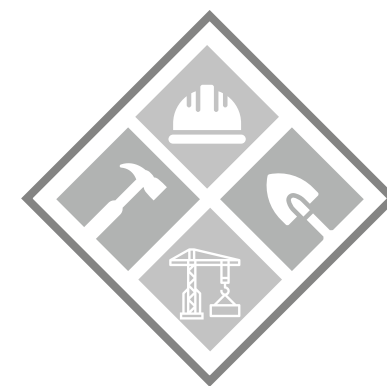

New workflow with allGeo

allGeo worked with T-mobile to deploy an end to end [time clocking solution](#) that supports the following capabilities:

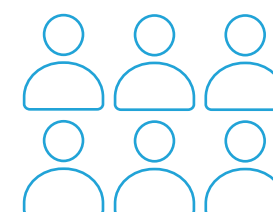

- Org setup with parent – subsidiary companies
- Employees setup under different subsidiary companies with managers / access management
- Geofence Sites setup per subsidiary with unique payroll codes
- Jobs Scheduling
- Live map to view teams status & communicate with field staff at any given time
- Event alerts to the team for site arrival, departure, running late
- Mileage reports
- Track Time based on Geofenced site attendance
- Track specific tasks using QR code
- Create payroll report with proper pay rate coding
- Jobs costing report with proper coding for every task hour spent on client projects
- Approval and [editing time clock reports to fix](#) missed punch ins
- Providing payroll ready information for import into their FSI payroll software

Success Metrics

- Improved visibility into daily operations
- Reduced mobile app complexity for field employees – limited training required
- Improved Jobs costing reports
- Reduced time to Payroll via precise record keeping and pay rate

About allGeo

allGeo is a cloud-hosted, low IT/ low code field service automation platform that helps mid-size and Enterprise businesses achieve field service excellence through automation.

The allGeo platform helps businesses automate and customize their field service workflows to better manage and optimize their field operations, field employees and field assets. With allGeo, field service businesses can significantly reduce payroll and operations costs while improving productivity and accountability.

Widely deployed in industries such as facility management, construction, transportation, trade and home healthcare, the allGeo platform provides a suite of cloud, mobile and data tools that can be customized to fit different use-cases and integrates with leading Payroll, CRM, and ERP systems.
